

OPERATIONS AND REFERENCE

ServicePro Monorepo Audit Report

1. Frontend Pages/Routes

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

> Generated: July 29, 2026 | Version: 8.0.0-alpha.1

Public (no auth required) — 9 pages

Route	Purpose
/	Landing/marketing page
/login	Sign-in form
/register	Account creation
/forgot-password	Password reset request
/reset-password	Password reset confirmation
/mfa	MFA code verification
/invite	Team invitation acceptance
/activate-access	Owner access token redemption
/p	Public storefront (via ?business=slug)

Authenticated (workspace layout) — 30 pages

Route	Feature Area
/dashboard	Operations overview with KPIs
/work-orders	Job/work order management
/schedule	Appointment scheduling
/customers	Customer CRM
/assets	Equipment/asset management
/knowledge	Knowledge base articles
/notifications	Notification inbox
/organization	Org structure (departments, locations)
/reports	Reporting and analytics
/marketplace	App marketplace (platform admin)
/docs	Documentation workspace
/docs/help	Help center
/dispatch	Dispatch board (drag & drop)
/crm	CRM pipeline / leads
/invoices	Invoice management

Route	Feature Area
/inventory	Inventory tracking
/marketing	Marketing campaigns
/estimates	Estimate creation
/financials	Financial dashboard
/ai-assistant	AI chat interface
/ai-knowledge	AI knowledge management
/automation	Workflow automation builder
/services	Service catalog
/storefront-builder	Public storefront editor
/website-builder	Website page editor
/technicians	Technician management
/team	Team management (owner role)
/platform-admin	Platform administration (admin role)
/profile	User profile/preferences
/settings	Settings hub
/system-status	Deployment diagnostics

2. Backend API Endpoints

Health (public, no auth)

- GET /healthz — Health check
- GET /readyz — Readiness probe

Auth (public, no auth)

- POST /auth/login — Login
- POST /auth/register — Register
- POST /auth/refresh — Token refresh
- POST /auth/password-reset/request — Request reset
- POST /auth/password-reset/confirm — Confirm reset
- POST /auth/invitations/accept — Accept invitation
- POST /auth/mfa/verify — MFA verification
- POST /auth/logout — Logout (requires auth)

Public Storefront

- GET /api/public/storefront/:slug — Public business page
- POST /api/public/storefront/:slug — Service request
- GET /tenant-profile — Public tenant profile

Customer Portal (portal auth)

- POST /portal/login — Portal login
- GET /portal/api/me — Portal user info
- GET /portal/api/tenant-profile — Tenant branding
- GET/POST /portal/api/bookings — Booking management
- GET /portal/api/invoices — View invoices
- GET /portal/api/estimates — View estimates

Core Business CRUD (authenticated, permission-gated)

Base Path	Methods	Feature
/api/v1/customers	GET/POST/PATCH/DELETE	Customer management
/api/v1/jobs	GET/POST/PATCH/DELETE	Work orders
/api/v1/services	GET/POST/PATCH/DELETE	Service catalog
/api/v1/estimates	GET/POST/PATCH/DELETE	Estimates
/api/v1/invoices	GET/POST/PATCH/DELETE	Invoices
/api/v1/payments	GET/POST/PATCH/DELETE	Payments
/api/v1/technicians	GET/POST/PATCH	Technicians
/api/v1/appointments	GET/POST/PATCH/DELETE	Scheduling
/api/v1/inventory	GET/POST/PATCH/DELETE	Inventory
/api/v1/materials	GET/POST	Materials/parts
/api/v1/dispatch	GET/POST/PATCH	Dispatch operations

CRM & Marketing

- /api/v1/crm/leads — Full CRUD + pipeline
- /api/v1/marketing/campaigns — Full CRUD + stats + send

AI & Knowledge

- /api/v1/ai/knowledge — Article CRUD + search
- /api/v1/ai/chat — AI chat
- /api/v1/ai/search — AI-powered search
- /api/v1/knowledge — Knowledge base articles + attachments

Automation & Workflows

- /api/v1/automation/workflows — Full CRUD + execute + history
- /api/v1/automation/triggers — Available triggers
- /api/v1/automation/actions — Available actions
- /api/v1/workflows — Workflow rules
- /api/v1/jobs/:id/transition — State machine transitions

Website Builder

- /api/v1/website/pages — Page CRUD + publish
- /api/v1/website/theme — Theme GET/PATCH
- /api/v1/website/media — Media upload/list/delete
- /api/v1/website/templates — Section templates

Files

- /api/v1/files — List, upload, delete

Reporting & Analytics

- /api/v1/dashboard/summary — Dashboard KPIs
- /api/v1/reports — Catalog + run by ID
- /api/v1/reports/dashboard — Report dashboard
- /api/v1/reports/schedules — Scheduled reports CRUD
- /api/v1/exports — Data exports

Notifications

- /api/v1/notifications — List/create/process/mark-read
- /api/v1/notifications/templates — Template management

Organization & Assets

- /api/v1/organization — Org units CRUD
- /api/v1/assets — Asset CRUD + history + attachments

User & Profile

- /api/v1/me — Current user
- /api/v1/profile — GET/PATCH + password + MFA + API tokens

Tenant & Settings

- /api/v1/tenant/settings — GET/PATCH
- /api/v1/tenant/branding — PATCH
- /api/v1/tenant/features — PATCH
- /api/v1/storefront/themes — GET
- /api/v1/storefront/starter-services — GET

Marketplace

- /api/v1/app-marketplace — Catalog + installations

Security & Compliance

- `/api/v1/security/events` — Security events
- `/api/v1/security/rate-limits` — Rate limit info
- `/api/v1/integrity` — Integrity checks
- `/api/v1/audit` — Audit trail
- `/api/v1/observability/metrics` — Observability
- `/api/v1/observability/summary` — Summary metrics

Privacy Operations (extensive)

- `/api/v1/privacy/cases` — Case orchestration
- `/api/v1/privacy/dsars` — DSAR management
- `/api/v1/privacy/consents` — Consent records
- `/api/v1/privacy/retention-policies` — Data retention
- `/api/v1/privacy/deletion-jobs` — Deletion management
- `/api/v1/privacy/processing-activities` — Processing records
- `/api/v1/privacy/dpias` — Impact assessments
- `/api/v1/privacy/breaches` — Breach management
- `/api/v1/privacy/discovery-scans` — Data discovery
- `/api/v1/privacy/appeals` — Appeal management
- `/api/v1/privacy/compliance-evidence` — Compliance evidence
- `/api/v1/privacy/risk-findings` — Risk findings
- `/api/v1/privacy/monitoring-controls` — Monitoring
- `/api/v1/privacy/data-transfers` — Data transfers
- Plus metrics endpoints for each privacy domain

Platform Admin

- `/api/v1/access/redeem` — Access token redemption
- `/api/v1/access/modules` — Module access info
- `/api/v1/team` — Team CRUD
- `/api/v1/platform/tenant-dashboard` — TMC dashboard
- `/api/v1/platform/owners` — Owner management + token issuance + password reset
- `/api/v1/platform/tenant-management` — Tenant lifecycle CRUD
- `/api/v1/platform/tmc/*` — Tenant Management Center (25+ sub-routes)
- `/api/v1/admin/workspaces` — Workspace list
- `/api/v1/workspace/current` — Current workspace

Phase-Based Enterprise Routes (dispatched)

Prefix	Phase	Domain
/api/v1/governance/	09	GRC governance
/api/v1/ai-platform/	10	AI platform services
/api/v1/platform-operations/	11	Platform ops
/api/v1/marketplace/	12	Marketplace
/api/v1/enterprise-analytics/	13	Analytics
/api/v1/enterprise-production/	14	Production
/api/v1/post-ga-lts/	15	Post-GA LTS
/api/v1/enterprise-intelligence/	16	Intelligence
/api/v1/global-scale/	17	Global scale
/api/v1/industry-solutions/	18	Industry solutions
/api/v1/platform-extensibility/	19	Extensibility
/api/v1/version3-foundation/	20–45	V3–V7 features

3. Major Feature Capabilities

Domain	Services	Repositories	Status
Auth & Identity	tokenService, passwordService, portalTokenService	userRepo, authEventRepo, authSessionRepo, accessEntitlementsRepo	Available
Tenant Management	tenantResolver, tenantSettingsService, platformAdminService	tenantSettingsRepo, tenantManagementRepo, tenantManagementCenterRepo, workspaceRepo	Available
CRM	customerService	customerRepo, crmLeadsRepo	Available
Scheduling & Dispatch	scheduleService	appointmentRepo, dispatchRepo, technicianRepo	Available
Work Orders	jobService, workflowService	jobRepo, workflowRepo	Available
Billing	paymentService, pricingService, billingMonetizationService	invoiceRepo, estimateRepo, paymentRepo, priceBookRepo	Available
Inventory	inventoryService	inventoryRepo, materialUsageRepo, warehouseRepo, purchaseOrderRepo	Available
Customer Portal	portalService	portalAccountRepo, portalBookingRepo	Available
AI	aiDispatchService, aiGovernanceService	aiKnowledgeRepo, aiDispatchRepo	Available
Marketplace	marketplaceService	serviceMarketplaceRepo, marketplaceRepo	Available
Website Builder	—	websiteBuilderRepo	Available
Storefront	— (via publicStorefront route)	tenantSettingsRepo	Available
Notifications	notificationService, communicationService	notificationRepo, messageTemplateRepo, communicationRepo	Available
Reporting	reportingService, csvExportService, biDashboardService	reportRepo, reportScheduleRepo, biDashboardRepo	Available
Security	securityIncidentService + 5 others	securityEventRepo + 8 others	Available

Domain	Services	Repositories	Status
Privacy	12 privacy services	12 privacy repositories	Available
Governance	17 governance services	17 governance repositories	Available
Automation	workflowService	automationRepo, workflowRepo	Available
Files & Media	mediaService, storageService	mediaAttachmentRepo	Available

4. Frontend → Backend Mapping

Frontend Page	API Dependencies
/dashboard	GET /api/v1/dashboard/summary
/work-orders	GET/POST/PATCH /api/v1/jobs
/schedule	GET/POST /api/v1/appointments
/customers	GET/POST/PATCH /api/v1/customers
/dispatch	GET /api/v1/dispatch, GET /api/v1/technicians
/crm	GET /api/v1/crm/leads, GET /api/v1/crm/pipeline
/invoices	GET /api/v1/invoices, GET /api/v1/payments
/estimates	GET/POST /api/v1/estimates
/inventory	GET /api/v1/inventory
/marketing	GET/POST /api/v1/marketing/campaigns
/ai-assistant	POST /api/v1/ai/chat, GET /api/v1/ai/search
/ai-knowledge	GET/POST /api/v1/ai/knowledge
/automation	GET/POST /api/v1/automation/workflows
/website-builder	GET/POST /api/v1/website/pages, GET/PATCH /api/v1/website/theme
/storefront-builder	GET /api/v1/tenant/settings, GET /api/v1/services, PATCH /api/v1/tenant/branding, GET /api/v1/storefront/themes
/marketplace	GET /api/v1/app-marketplace
/reports	GET /api/v1/reports, GET /api/v1/reports/dashboard
/notifications	GET /api/v1/notifications
/knowledge	GET/POST /api/v1/knowledge
/assets	GET/POST /api/v1/assets
/organization	GET/POST /api/v1/organization
/platform-admin	GET /api/v1/platform/tenant-dashboard, GET /api/v1/platform/owners, GET /api/v1/admin/workspaces
/team	GET/POST /api/v1/team
/profile	GET/PATCH /api/v1/profile
/settings	GET/PATCH /api/v1/tenant/settings
/p (storefront)	GET /api/public/storefront/:slug
/login	POST /auth/login

Shared Auth Flow

All authenticated pages use AuthGuard → calls GET /api/v1/me → redirects to /login on 401, /activate-access on 402.

Middleware Chain (every authenticated request)

- 1 requestId → unique ID
- 2 securityHeaders → response headers
- 3 cors → origin whitelist
- 4 bodyLimit → payload size
- 5 tenant → tenant ID from header
- 6 requestContext → attach repositories
- 7 rateLimit → throttling
- 8 requestAudit + requestMetrics → observability
- 9 authGuard → JWT verification
- 10 ownerAccessGuard → subscription check
- 11 moduleAccessGuard → feature module check
- 12 attachOperationalTenant → resolve tenant UUID

5. Documentation & Test References

Documentation (docs/)

- docs/deployment-checklist.md — Production deployment steps
- docs/release/8.0.0-alpha.1/ — Release certification docs (7 files)
- docs/sales/ — Enterprise sales documentation
- docs/sales-kit/ — Complete sales & marketing kit (10 documents)
- docs/image-generation-prompts.md — AI hero image prompts
- docs/MONOREPO-AUDIT-REPORT.md — This document

Tests (551 files in tests/)

- Smoke tests for each sprint (sprint47–sprint774)
- Platform admin tests (workspace, owner provisioning, TMC)
- Integration tests (phases 65–71)
- Domain tests (payments, privacy, CRM, auth, portal)
- Infrastructure tests (render, postgres, supabase, package integrity)

Key Config Files

- render.yaml — Render deployment blueprint
- wrangler.toml (apps/web) — Cloudflare Pages config

- `docker-compose.yml` — Dev environment
- `docker-compose.production.yml` — Production environment
- `package.json` — 629 npm scripts

Summary Stats

Metric	Count
Frontend pages	39
Backend route modules	166
Services	155
Repositories	177
Middleware	16
Test files	551
Database migrations	685
Marketplace packs	30
Phase modules	37 (phases 09–45)
npm scripts	629
