

OPERATIONS AND REFERENCE

Branch Protection

ServicePro product and operations documentation

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

Recommended GitHub branch protection for main:

- Require pull request before merging.
- Require approvals.
- Dismiss stale approvals.
- Require status checks to pass.
- Require branches to be up to date.
- Require conversation resolution.
- Restrict force pushes.
- Restrict deletions.

Required checks:

```
Node runtime tests
Build API image
PostgreSQL migration smoke
```

Recommended merge strategy:

```
Squash merge for sprint branches.
Merge commit only for coordinated release branches.
```
