General Notes for All Images

- Style: Commercial marketing photography, NOT stock photo generic — should feel like a real local service company's hero image
- Composition: Leave space (roughly 1/3) for text overlay (company name, tagline, CTA button)
- People: Show competent, friendly professionals at work — diverse representation encouraged
- Quality: Sharp, well-lit, high resolution, professional color grading
- Mood: Trustworthy, competent, approachable, local-business friendly
- Avoid: Clip art style, cartoonish, overly staged/artificial poses, stock watermarks
- Format: Save as optimized JPG at 1200×600px, quality 85%, then update the industryHeroMap in publicStorefront.js to reference .jpg instead of .svg

After Image Generation

Once all images are generated and saved to `apps/web/public/storefront/industries/`:

- 1 Update `apps/api/src/routes/publicStorefront.js` — change `.svg` → `.jpg` in the `industryHeroMap`
- 2 Optionally keep the SVG versions as fallbacks
- 3 Commit and push
