

PHASE DOCUMENTATION

Phase 67 Operations Runbook

Generate a local command-center report

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

```
npm run release:command-center-report
```

Run command-center tests

```
npm run test:sprint766
npm run test:phase67
```

API endpoints

- GET /api/release-command-center/environments
- GET /api/release-command-center/timeline
- GET /api/release-command-center/audit
- POST /api/release-command-center/dashboard/build
- POST /api/release-command-center/audit

Operational rule

The command center is an observability and governance plane. It must not directly bypass promotion, rollout, quarantine, or rollback controls.
