

PHASE DOCUMENTATION

Phase 67 Security Model

ServicePro product and operations documentation

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

Security controls:

- audit records use deterministic SHA-256 integrity hashes;
- API queries limit result sizes;
- command-center views do not modify lower-level release controls;
- audit exploration supports actor, action, resource type, and outcome filtering;
- generated evidence remains outside source control;
- dashboard data is built from governed release sources;
- the UI does not expose secrets or raw credentials.
