

PHASE DOCUMENTATION

# Phase 69 Operations Runbook

Simulate release policy

Publication edition | 2026-08-03

## Document Control

|                 |                                                                                             |
|-----------------|---------------------------------------------------------------------------------------------|
| <b>Purpose</b>  | Enterprise platform overview and buyer evaluation reference                                 |
| <b>Audience</b> | Business leaders, platform administrators, evaluators, partners, and technical stakeholders |
| <b>Scope</b>    | Capabilities, architecture, security, deployment, adoption, outcomes, and terminology       |
| <b>Source</b>   | ServicePro repository documentation; technical meaning preserved                            |

```
npm run release:policy-simulate
```

## Generate control recommendations

```
npm run release:controls-optimize
```

## Governance rule

Optimization recommendations must never modify active controls automatically. A named approver and approval reference are required before creating and activating a new policy version.
