

OPERATIONS AND REFERENCE

Release Checklist

Before tagging

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

```
npm install
npm run migrations:check
npm test
npm run config:check
docker build -t servicepro-api:<version> .
```

Tag

```
git tag v0.72.0
git push origin v0.72.0
```

Deployment

```
docker compose up -d --build
docker compose exec api npm run migrate
docker compose exec api npm run seed:services
```

Post-deployment checks

```
Invoke-RestMethod https://your-domain/healthz
Invoke-RestMethod https://your-domain/readyz
```

Rollback

- Re-deploy the previous image tag.
- Restore database backup only if the release included destructive migration behavior.
- Preserve logs and audit events for diagnosis.
