

PLATFORM OVERVIEW

ServicePro Sales Documentation

Contents

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

This directory contains enterprise sales materials for the ServicePro platform.

Document	Purpose
SERVICEPRO-ENTERPRISE-PLATFORM.md	Primary enterprise sales guide covering platform capabilities, pricing tiers, architecture, security, deployment, and competitive positioning

Audience

- Prospective customers and enterprise buyers
- Technical evaluators and solution architects
- Implementation partners and system integrators
- Investors and business stakeholders

Maintenance

This document reflects capabilities evidenced in the repository source code. Feature availability labels follow this classification:

- Available — Implemented and production-ready with routes, services, and UI
- Configurable — Available with tenant-level or environment-level configuration options
- Enterprise Option — Available under enterprise tier or requires additional enablement
- Preview — Implemented with API routes but UI or workflows may be limited
- Planned — Designed and specified but not yet fully implemented in repository
- Integration Dependent — Requires external service connection to function

Update this document when new features ship or availability status changes.
