

SPRINT DOCUMENTATION

Sprint 33 - AI Knowledge Base and RAG Foundation

ServicePro product and operations documentation

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

This sprint establishes the platform foundation for AI-assisted field-service work.

Included:

- Knowledge source registry.
- Document ingestion jobs.
- Document chunk metadata.
- Embedding index metadata.
- Semantic search query logs.
- Technician troubleshooting assistant structures.
- AI estimate recommendation structures.
- AI dispatch recommendation structures.
- AI response audit/safety log.

Production follow-up:

- Add actual document parser for PDF/DOCX/TXT/HTML.
- Add embedding generation worker.
- Add pgvector or external vector database.
- Add prompt templates.
- Add tenant-level AI usage limits.
- Add source citation enforcement.
- Add redaction for sensitive customer data.
