

SPRINT DOCUMENTATION

Sprint 4 Notes — Customer Portal, Notifications, Printable Documents

Added

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

- Customer portal access request page: `/portal/request`
- Magic-link customer portal: `/portal/:token`
- Customer detail page with portal link generation: `/admin/customers/:id`
- Notification queue: `/admin/notifications`
- Stub send action for queued messages
- Printable estimate route: `/admin/estimates/:id/print`
- Printable invoice route: `/admin/invoices/:id/print`
- Email queue actions for estimates and invoices
- PostgreSQL migration starter: `src/db/postgres/003_sprint4_customer_portal_notifications.sql`

Important

Sprint 4 does not contact real SMTP, Twilio, or payment providers. It queues messages in `notification_queue` so the installer/developer can verify data safely before enabling external providers.

Smoke test

- 1 Run setup and login as owner.
- 2 Open Customers and create or view a customer.
- 3 Generate a portal link.
- 4 Open Notifications and confirm an email queue row exists.
- 5 Copy the `/portal/...` token path from the customer detail page.
- 6 Open it while logged out or in a private browser window.
- 7 Create an estimate/invoice and test Print / Save PDF.
