

SPRINT DOCUMENTATION

Sprint 64 - Notifications Runtime

[What changed](#)

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

Apply this patch over Sprint 63.

- Added message templates.
- Added notification queue.
- Added template rendering.
- Added notification process script.
- Added notification RBAC permissions.
- Added JSON and PostgreSQL repositories.

Endpoints

```
GET /api/v1/notifications/templates
POST /api/v1/notifications/templates
GET /api/v1/notifications
POST /api/v1/notifications
POST /api/v1/notifications/process
```

Example queue body

```
{
  "templateKey": "booking_requested",
  "toAddress": "customer@example.com",
  "toName": "Maria Johnson",
  "data": {
    "customerName": "Maria",
    "serviceType": "Drain cleaning",
    "requestedDate": "2026-07-10"
  }
}
```

Process queued notifications:

```
npm run notifications:process
```
