

SPRINT DOCUMENTATION

Sprint 761 — Governed Quarantine Override

Purpose

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

Sprint 761 adds a controlled emergency override path for releases blocked by Sprint 760 quarantine enforcement.

Required controls

An override is authorized only when all of the following are valid:

- the request targets the active quarantine identifier;
- a change-management ticket is supplied;
- the justification contains meaningful detail;
- the request has not expired;
- at least two distinct people approve;
- one approval is from a release manager;
- one approval is from security or SRE.

Duplicate approvers do not satisfy dual-control requirements.

Exit behavior

```
npm run release:override-check
```

The command exits with code 4 when authorization is denied.

Local verification uses:

```
node scripts/check-release-quarantine-override.js --allow-denied
```

because no production override request is expected in a development checkout.

Input file

Default path:

release-evidence/release-quarantine-override-request.json

Example:

```
{
  "quarantineId": "replace-with-active-quarantine-id",
  "changeTicket": "CHG-1001",
  "justification": "Emergency mitigation with documented rollback and monitoring.",
  "expiresAt": "2026-07-19T12:00:00.000Z",
  "approvals": [
    {
      "approver": "release.manager@example.com",
      "role": "release-manager",
      "approvedAt": "2026-07-18T12:00:00.000Z"
    },
    {
      "approver": "security@example.com",
      "role": "security",
      "approvedAt": "2026-07-18T12:01:00.000Z"
    }
  ]
}
```

Output evidence

release-evidence/release-quarantine-override-authorization.json

Generated evidence is environment-specific and must not be committed.
