Storefront Builder Guide

Overview

Publication edition | 2026-08-03

Document Control

Purpose	Enterprise platform overview and buyer evaluation reference
Audience	Business leaders, platform administrators, evaluators, partners, and technical stakeholders
Scope	Capabilities, architecture, security, deployment, adoption, outcomes, and terminology
Source	ServicePro repository documentation; technical meaning preserved

The Storefront Builder lets you create a public business page where potential customers can discover your services, learn about your company, and book appointments. Think of it as your mini-website — no design skills required.

What the Storefront Is and How Customers See It

What It Is

Your storefront is a public web page that anyone can visit. It displays your business name, description, services, and a way to get in touch or book. When someone searches for your business online or clicks a link you share, this is what they see.

What Customers See

- Your business name and logo
- A cover image (hero image) at the top
- A description of what you do
- A list of your services with descriptions and pricing
- A way to request service or book an appointment
- Your contact information

Setting Your Business Name and Description

What It Is

Your business name and description are the first things visitors read. They should clearly explain who you are and what you do.

How to Set Them

- 1 Go to Storefront Builder in the sidebar.
- 2 Find the Business Name field at the top.
- 3 Enter your business name exactly as you want it to appear.

- 4 In the Description field, write 2-3 sentences explaining your services and what makes you different.
- 5 Click Save.

Tips

- Keep your description focused on what customers care about: what you do, where you serve, and why they should choose you.
- Example: "Johnson Plumbing provides fast, reliable plumbing repair and installation in the greater Portland area. Family-owned since 2005, we treat every home like our own."
- Avoid jargon — write as if explaining to a neighbor.

Choosing a Theme

What It Is

Themes control the colors and overall look of your storefront page. Pick one that matches your brand or the impression you want to make.

How to Choose a Theme

- 1 Go to Storefront Builder in the sidebar.
- 2 Scroll to the Theme section.
- 3 Browse the available themes (each shows a preview).
- 4 Click the one you like.
- 5 The preview updates immediately so you can see how it looks.
- 6 Click Save when you're happy.

Tips

- Pick a theme that's easy to read — high contrast between text and background.
- Lighter themes tend to work well for residential services; darker themes suit modern/tech brands.
- You can change your theme at any time without losing your content.

Selecting a Cover Image (Hero Image)

What It Is

The cover image (also called hero image) is the large banner photo at the top of your page. It sets the tone for visitors.

How to Select a Cover Image

- 1 Go to Storefront Builder in the sidebar.
- 2 Find the Cover Image section.
- 3 Click the dropdown to browse available images.
- 4 Select an image that represents your business (team photo, work in progress, clean results).
- 5 The preview updates instantly.
- 6 Click Save.

Tips

- Choose a high-quality image that's well-lit and professional.
- Images of real work (your team on a job, a finished project) build more trust than stock photos.
- The image will be cropped to fit the banner area — make sure the key content is in the center.
- If you don't see an image you like, ask your administrator to upload new options.

Adding and Configuring Services

What It Is

Services listed on your storefront tell visitors what you offer. Each service shows a name, description, and optionally a price or price range.

How to Add Services

- 1 Go to Storefront Builder in the sidebar.
- 2 Scroll to the Services section.
- 3 Click Add Service.
- 4 Choose a service from your existing catalog, or create a new one.
- 5 Add or edit the public description (what customers see — keep it friendly and clear).
- 6 Optionally show a price or "Starting at" amount.
- 7 Click Save.

How to Reorder Services

- Drag services up or down to change the display order.
- Put your most popular or important services at the top.

Tips

- Limit your storefront to 6-10 services. Too many choices can overwhelm visitors.
- Use plain language in descriptions: "We'll fix your leaky faucet" beats "Faucet repair and replacement services."
- If you don't want to show prices publicly, leave the price field blank — customers will request a quote instead.

Publishing and Previewing Your Page

What It Is

Your storefront isn't visible to the public until you publish it. You can preview it at any time to see what customers will see.

How to Preview

- 1 Go to Storefront Builder in the sidebar.
- 2 Click Preview in the top-right area.
- 3 A new tab opens showing your storefront as a visitor would see it.
- 4 Check that everything looks right — name, description, services, images.

How to Publish

- 1 Make sure you're happy with the preview.
- 2 Go back to the Storefront Builder.
- 3 Click Publish.
- 4 Your page is now live and accessible at your public URL.

How to Unpublish

- If you need to take your page down temporarily, click Unpublish. Your content is saved but hidden from the public.

Tips

- Preview every time before publishing — especially after making changes.
- Share your storefront link on social media, email signatures, and business cards.
- Unpublishing doesn't delete anything — you can re-publish whenever you're ready.

Editing Service Descriptions and Images

What It Is

After adding services, you can update their descriptions and images at any time to keep things fresh and accurate.

How to Edit

- 1 Go to Storefront Builder in the sidebar.

- 2 Find the service in the Services section.
- 3 Click Edit (pencil icon) next to the service.
- 4 Update the description, price, or image.
- 5 Click Save.

Tips

- Update descriptions seasonally (e.g., "Fall furnace tune-ups now available").
- Add images to services when possible — services with photos get more clicks.
- Keep descriptions under 2-3 sentences — visitors skim, they don't read essays.

Setting Your Public URL Slug

What It Is

Your URL slug is the web address where people find your storefront. It's the part that comes after the main ServicePro address (e.g., `servicepro.com/your-business-name`).

How to Set It

- 1 Go to Storefront Builder in the sidebar.
- 2 Find the URL Slug field (usually near the top or in settings).
- 3 Enter your preferred slug — keep it short, lowercase, and use dashes instead of spaces.
- 4 The system checks if it's available.
- 5 If available, click Save.

Examples of Good Slugs

- johnson-plumbing
- cool-air-hvac
- sparkle-clean-services

Tips

- Use your business name or a recognizable abbreviation.
- Avoid numbers and special characters — keep it simple and memorable.
- Once set, try not to change it — people may have bookmarked or linked to your current address.
- Share your full storefront URL on business cards, social media, and email signatures.
