Table of Contents

[Document Control](#)

This sprint adds the operational foundation needed to run ServicePro safely.

Included:

- Dockerfile
- docker-compose.production.yml
- Kubernetes deployment/service/ingress examples
- Environment validation script
- Backup script
- Restore checklist
- Observability notes
- Logging conventions
- Release checklist
- Incident response runbook

Production follow-up:

- Add real PostgreSQL migration runner.
- Add automated certificate provisioning.
- Add cloud-native secret management.
- Add hosted metrics backend.
- Add centralized log shipping.
