[Commands](#)

Apply this patch over Sprint 54.

- Added /auth/login.
- Added /api/v1/me.
- Added HMAC JWT-style access token service.
- Replaced static token guard with token verification.
- Added password hashing using bcryptjs.
- Added user repository for JSON and PostgreSQL.
- Added auth seed script.
- Added runtime auth PostgreSQL migration.

Commands

```
npm install
npm test
```

Run JSON mode:

```
$env:DATA_STORE="json"
npm run reset
npm run dev
```

Login:

```
Invoke-RestMethod -Method Post -ContentType "application/json" -Body '{"email":"owner@example.com",
"password":"ChangeMe123!"}' http://localhost:3000/auth/login
```

PostgreSQL mode:

```
$env:DATA_STORE="postgres"
npm run migrate
node scripts/seed-auth.js
npm run dev
```
